ABSTRACT

Fahmi, Syahrul. 2024. English Culinary Lexicons (A Study of Food and Beverage Names at Restaurants and Cafes in Kudus City). Skripsi. English Education Department, Teacher Training and Education Faculty, Muria Kudus University. Advisor: (1) Dr. Ahdi Riyono, S.S., M.Pd. (2) Dr. Slamet Utomo, M.Pd.

Keyword: Lexicons, Culinary, Word Formation, Reference

This study aims to find out the names of food and beverage menus in restaurants and cafes in Kudus City. Furthermore, this study also aims to find out the structure of word formation used in naming food and beverage menus in restaurants and cafes. This research uses the theory of (Bauer, 1983). Then, another goal is to find out the references used in naming food and beverage menus in restaurants and cafes. This study uses the theory of (Ogden, 2013).

This research uses a descriptive qualitative design with observation instruments and documents. In this study, researchers selected food and beverage menus from 25 restaurants and cafes in Kudus City as research samples.

From the findings show that restaurants and cafes use English food and beverage menus, with more beverage menus than food menus. Then, in the structure of word formation, 4 structures have been found, namely compounding, clipping, blending, and acronym with more compounding than others. Then, the names of food and drinks use references that have meaning in each word.

From the results that have been found, it can be concluded that the drink menu can be more varied because they use more drinks as their signature menu. The name of the menu is made based on word formation structure and appropriate references. Thus, readers are expected to gain insight into the culinary lexicon, word formation structure, and references in food and beverage menus in restaurants and cafes.
